

**FOR IMMEDIATE RELEASE**

## **Rose Computer Technology Services, Inc. Earns CompTIA Security Trustmark+™**

*Validation that Rose Computer uses industry accepted security best practices*

**Williston, Vermont, 1-12-2021 – Rose Computer Technology Services, a Vermont based IT Management and Cyber Security firm** announced today it has received the [CompTIA Security Trustmark+](#) from [CompTIA](#), the non-profit association for world's information technology (IT) industry.

The CompTIA Security Trustmark+ validates that Rose Computer Technology Services uses the security processes identified by the IT industry as generally accepted best practices and has been evaluated by an independent third-party assessor as meeting the criteria established by the CompTIA Security Trustmark+. Based on the National Institute of Standards and Technology (NIST) Cybersecurity Framework, the CompTIA Security Trustmark+ is a comprehensive review of the security posture of any IT business, applicable across multiple industries and compliance regulations.

“The CompTIA Security Trustmark+ signifies that Rose Computer Technology Services adheres to our industry’s highest standards for security practices and business processes in critical components of identification, protection, detection, response, and recovery as related to data security,” said Nancy Hammervik, senior vice president, industry relations, CompTIA. “Earning the Security Trustmark+ demonstrates a true commitment to address the challenges of security compliance facing our industry today.”

*“I am proud to be the first Vermont firm to achieve this endorsement”, says David Rose, company founder. “This demonstrates that we are a market leader in helping our clients to protect their corporate assets, data, and intellectual property. The cyber security landscape continues to become more threatening and we are committed to being a leader in this space”.*

To earn the CompTIA Security Trustmark+ Rose Computer Technology Services successfully passed an independent assessment of their security policies, capabilities, practices, and processes against industry best practices in areas such as:

-MORE-

- Security technologies, including firewalls, anti-Virus/ malware/ spyware and intrusion detection
- Vulnerability assessment detection
- Data encryption
- Technical employee knowledge/expertise
- Security clearances and background checks
- Physical and hardware security
- Permissions, passwords and other security requirements
